Dear Mr. Hogan:

In regard to the Toxicity Characteristic Leaching Procedure (TCLP) Final Rule information recently mailed to our company, please be advised of the following changes in your information pertaining to our location.

First, we are no longer Patco Products. We were purchased by NV CSM in 1988. Our company name is now American Ingredients Company. Our EPA identification number should remain MOD086787017.

Secondly, the materials classified as F003, F005, and D001 in the May, 1984, hazardous chemical site investigation by the Missouri Department of Natural Resources no longer exist. The product which produced that waste has been reformulated, and we no longer generate the quantities of waste to be classified as a large quantity generator. As a matter of fact, we are not presently generating enough waste to be even a small quantity generator due to recycling efforts within the production facility.

Please make these corrections to your records. If you require additional information, please feel free to call me at (816) 763-8377. Thank you for your assistance.

Sincerely yours,

Melvan L. Boyer
